Description

The aim of this summer school is to teach PhD students and Post-Docs current techniques in panel data analysis and network analysis. The instructors, [Jeffrey Wooldridge](#) and [Steven Durlauf](#), are leading experts in these fields. In addition to attending lectures, participants will have the opportunity to discuss their research ideas with the instructors and their peers via presentations, posters, and individual meetings. The econometrics instruction will be complemented by separate sessions on data management organized by Joachim Winter.
