

Field Days 2026: Experiments Outside the Lab

Call for Papers

ESMT Berlin | 4 - 5 June 2026 | Berlin, Germany

We invite submissions to the *Field Days 2026: Experiments Outside the Lab* jointly hosted by ESMT Berlin and Humboldt-Universität zu Berlin. The workshop brings together researchers who conduct experiments outside the laboratory (field and natural field experiments, large-scale randomized evaluations, and closely related designs) to present and discuss their work in a small, feedback-intensive format. We aim to include field experiments on a broad set of topics, including methodological advances. Please note that, given the workshop's small-scale format, only a limited number of presentation slots are available.

Program committee:

Steffen Altmann (University of Würzburg), Michèle Belot (Cornell University), Robert Dur (Erasmus University Rotterdam), Dietmar Fehr (University of Stuttgart), Raji Jayaraman (ESMT Berlin), Jonas Radbruch (Humboldt Universität zu Berlin)

Presentation formats

- **Full presentations:** Selected papers will be allocated a standard talk slot.
- **Flash talks:** Short presentations. Preference will be given to PhD students.

For full presentation speakers, we will cover economy travel and hotel accommodation. Details and reimbursement procedures will be provided after notifications of acceptance.

How to submit

We invite researchers to submit a paper or extended abstract (in PDF) [here](#). Please indicate whether you submit for a full presentation, a flash talk, or either. Submissions should also include title, authors, affiliations, name and email of corresponding author. **The deadline for submission is March 15, 2026.** Authors of accepted papers will be notified by April 15, 2026.

Registration as participant

We also have a limited number of spots available for non-presenting local participants. If you want to register for participation in the Field Days 2026, please also use this form [here](#).
